

$\dot{V}_d$	desired flow rate
$\dot{V}_c$	current flow rate
$A_{\text{ff}}(\dot{V}_d)$	feedforward amplitude to achieve a given $\dot{V}_d$
$A_{s,p}$	set amplitude of the primary pump
$A_{c,p}$	current amplitude of the primary pump
$A_{s,s}$	set amplitude of the secondary pump
$A_{c,s}$	current amplitude of the secondary pump
A_{max}	maximum amplitude of the pumps = 255
